

PROMPT:

Buenas ChatGPT, soy profesor de Ciencias Naturales en un colegio de la Comunidad de Madrid. Me gustaría que realizaras una actividad para 6º de Educación Primaria sobre el Aparato Reprodutor. El idioma es en inglés y deberá contener todo tipo de actividades de repaso sobre dicho tema. Por otro lado, quiero que realices de forma separada, esa misma actividad adaptada a una alumna con Trastorno del Desarrollo del Lenguaje.

RESPUESTA:

Aquí tienes una actividad completa en inglés sobre el aparato reproductor para 6º de Educación Primaria. También he creado una versión adaptada para una alumna con Trastorno del Desarrollo del Lenguaje (TDL), con lenguaje más sencillo, apoyo visual y actividades más estructuradas.

ACTIVIDAD GENERAL

Title: *The Human Reproductive System*

Objective: Learn about the human reproductive system, its parts, and functions.

1. Vocabulary Match

Match the words with their definitions:

1. Ovaries
2. Testes
3. Uterus
4. Sperm
5. Egg (Ovum)
6. Fertilization

- A. Male reproductive cell.
- B. The place where a baby grows.
- C. Female reproductive cell.
- D. The process where sperm and egg join.
- E. Organs that produce sperm.
- F. Organs that produce eggs.

2. Label the Diagram

Provide a diagram of the male and female reproductive systems. Students must label **ovaries, uterus, vagina, testes, penis, sperm, egg**.

3. True or False

Write *True* or *False*:

1. The uterus is where the sperm is produced.
2. Only females have reproductive organs.
3. Fertilization happens when an egg and a sperm meet.
4. The male reproductive system produces eggs.
5. The female reproductive system includes the ovaries and the uterus.

4. Fill in the Blanks

Complete the sentences:

1. The male reproductive system produces _____.
2. The female reproductive system produces _____.
3. The place where a baby grows is called the _____.
4. When a sperm meets an egg, it is called _____.

5. Discussion

- Why is the reproductive system important?
- What happens during fertilization?

ACTIVIDAD ADAPTADA PARA ALUMNA CON TDL

Title: *The Human Reproductive System – Easy Version*

Objective: Understand the main parts of the reproductive system using simple words and pictures.

1. Picture Matching

Match the pictures to the words:

- 🍌 Ovaries
- ⚽ Egg (Ovum)
- 🍌 Uterus
- 🟢 Sperm
- 🏀 Testes

Students connect the pictures to the correct word.

2. Choose the Correct Answer

Circle the right answer:

1. **Who has ovaries?** (Boys / Girls)

2. **Who has testes?** (Boys / Girls)
3. **Where does a baby grow?** (In the uterus / In the stomach)
4. **What meets to make a baby?** (Egg + Sperm / Water + Food)

3. Fill in the Gaps (With Word Bank)

(Word Bank: sperm, egg, uterus)

1. The _____ is the part where a baby grows.
2. Boys make _____.
3. Girls make _____.

4. Yes or No? (With Visual Support)

Show pictures and ask:

1. "Is this a sperm?" ☒ ☐
2. "Do boys have ovaries?" ☒ ☐
3. "Do girls have a uterus?" ☒ ☐

5. Simple Explanation with Storytelling

Tell a simple story with pictures:

"Sofia has eggs inside her body. Juan has sperm. When they grow up, the egg and the sperm can meet, and a baby starts growing inside the uterus."

Esta versión adaptada usa imágenes, preguntas cerradas y frases cortas para facilitar la comprensión. ¿Te gustaría añadir algo más? 😊
