

Fish

Fish have scales and fins. They breathe with gills. They live in rivers, lakes and oceans. They lay soft eggs in water. Fish eat plankton, insects, other fish and water plants.

 What is Danny reading about?

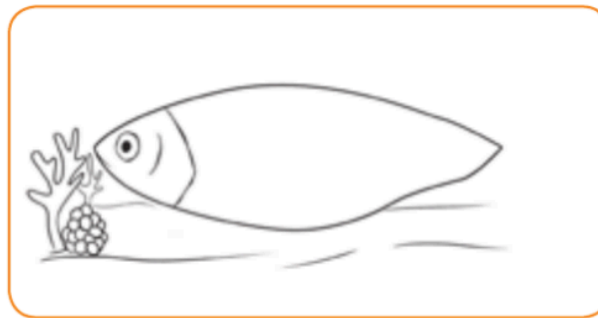

1  Draw the missing parts. Colour and label.

gills

fins

soft eggs

scales

tail

2  Which two are not fish? Listen and put a cross.

shark

clownfish

dolphin

trout

whale

swordfish
