

Fell The Water Cycle

The water cycle

Takes the  (water) and moves it
Up and down and all around the Earth

The water cycle
uh uh uh uh uh uh

(Evaporation)

Comes when the heat from the  (Sun)
Warms up all the groundwater
Then it turns to water vapour

Evaporation
uh uh uh uh uh uh

I know it is the water cycle happening again

(Condensation)

Takes over it goes up to the clouds
Water vapor cools down
And it changes to a liquid, now

Condensation
uh uh uh uh uh uh

Precipitation

Happens when the drops get big
It falls like  rain, snow,
sleet, and hail upon my head

Precipitation
uh uh uh uh uh uh

I know it is the water cycle happening again
