

ARTS INSTRUCTIONS

Hello children,

We are going to work Arts activities too, so you have to finish the Landscape and send me a picture of it finished. If you have finished, you must send me a picture of it too.

Here you are the pictures:

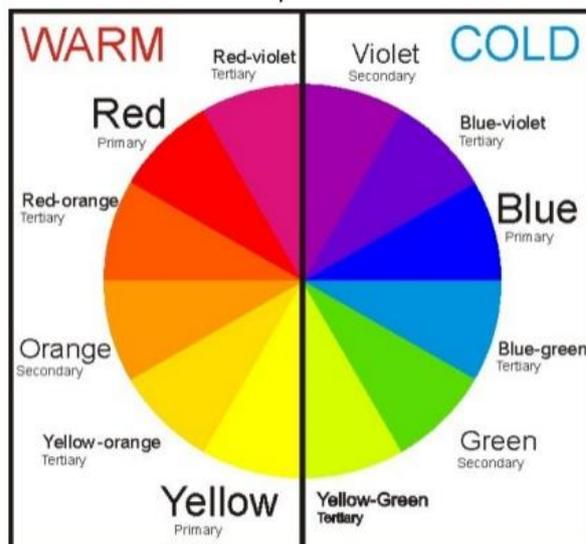

Remember that you have to trace the lines with markers and colour with crayons.

NEW ACTIVITY

If you have finished the Landscapes, you must continue with the following activity:

As you know we can distinguish warm and cold colours if you look at the picture:

Every color has a certain tendency towards what's called warm and cold.

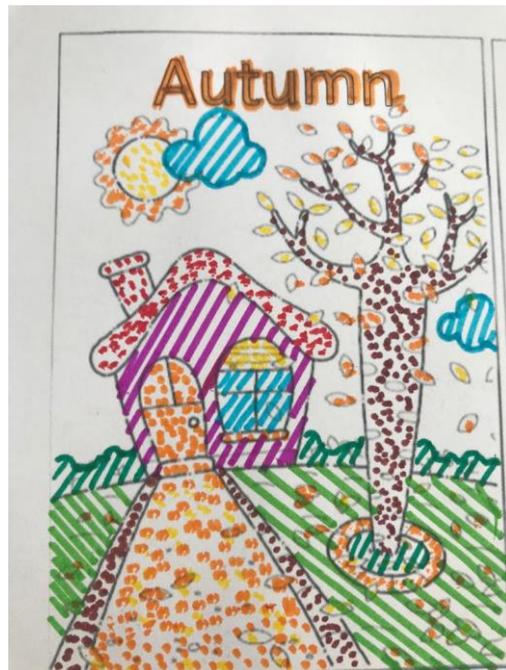

We can see that in **Autumn** and in **Summer** the most common colours are the Warm ones: red, orange, yellow... however in **Winter** and in **Spring** we can distinguish the Cold ones: blue, purple, green...

Now you have to colour the **Seasons of the year sheet** using the correct colours, but you have to do it using different techniques:

If you are going to use Warm colours you have to use pointillism. (look at the example)

If you are going to use Cold colours you have to use draw lines. (look at the example)

You have the whole week to finish this activity, so you have to send me a picture of it the 20th March
