

## CREATIVE PARK

<http://www.canon.com/c-park/en/>

1. Cut out the west and east cross-sections and fold down the tabs on each.

2. Glue the side tabs of the west and east cross-sections together at right angles.

3. Build the base by connecting western base A and western base B.

4. Attach the series of parts beginning with the western base and continuing through incline 1, incline 2, and the rest of the inclines to the west cross-section.

Build the east side in the same way

5. Glue the west cross-section to the east cross-section.

Before starting assembly: Writing the number of each section on its back side before cutting out the sections is highly recommended.  
(\* This way, you can be sure which section is which even after cutting out the sections.)

→ Indicates where sections should be glued together.

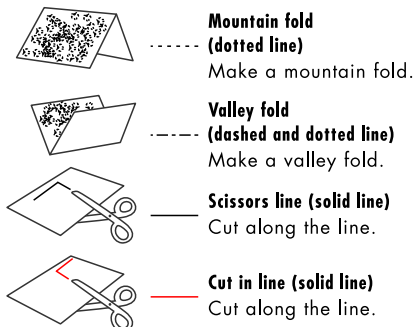

### Assembly Instructions : One A4 sheet (No.1)

\* Build the model by carefully reading the Assembly Instructions , in the parts sheet page order.

\*Hint: Trace along the folds with a ruler and an exhausted pen (no ink) to get a sharper, easier fold.

### Assembly Instructions

- **Glue spot (Red dot)**  
Glue parts with the same number together.
- **Glue spot (Green dot)**  
Glue within the same part.
- **Glue spot (Blue dot)**  
Glue to the rear of the other part.

#### Tools and materials

Scissors, set square, glue (We recommend stick glue), pencil, used ballpoint pen, toothpicks, tweezers, (useful for handling small parts)

#### Assembly tip

Before gluing, crease the paper along mountain fold and valley fold lines and make sure rounded sections are nice and stiff.

#### Caution

Glue, scissors and other tools may be dangerous to young children so be sure to keep them out of the reach of young children.
